Saturday, May 3

Session • 4–5:30 pm • Room 205A

Surgical Oncology Special Interest Group Networking Meeting

Join the Surgical Oncology Special Interest Group for a comprehensive discussion on caring for patients who have received treatment for esophageal cancer. You’ll learn about the incidence and etiology of esophageal diseases and how treatment options like laparoscopic-assisted robotic esophagectomy and Ivor-Lewis procedure affect postoperative care.

Content Area: Clinical Practice

Content Level: Intermediate

Coordinator/Speaker:
Trudy Hamilton, C-FNP
Surgical Oncology Nurse Practitioner
The Ohio State University James CCC
Trudy.Hamilton@osumc.edu

Full Disclosure:
Nothing to Disclose

Objectives:
At the end of this session, participants will be able to:
1. Identify three risk factors of esophageal cancer.
2. Identify three treatment options for esophageal cancer.
3. Describe similarities in the post operative care of each surgical modality.
4. Analyze and explain the differences in the postoperative care of each modality.

Content Outline:
I. Incidence and etiology of esophageal diseases
   A. Esophageal cancers
   B. Non-cancer diseases of the esophagus
II. Treatment options
   A. Medical
   B. Surgical
      1. Robotic or laparoscopic assisted esophageal resection
      2. Open esophageal resection
III. Postoperative care
   A. Minimally invasive postoperative surgical care
   B. Open surgical resection postoperative care
IV. Case study
   A. Minimally invasive procedure
