

Fortinet's Secure Student Framework

Adapting to a dynamic digital learning environment while maintaining data privacy

IT Security is at the forefront of the minds of every school official. Data breaches, DDoS attacks, secure wireless deployments for 1:1 and BYOD environments, CIPA compliance, and student data privacy laws are among many of the top cyber security issues that impact educational organizations of all sizes. Imagine a secure, yet flexible security infrastructure framework that accomplishes these goals without breaking the bank.

To meet this need and many others, Fortinet has established a comprehensive security framework to simplify management of BYOD and 1:1 classrooms. Fortinet's framework allows schools to allocate bandwidth towards relevant and secure content. All of this is done while assuring the safest and most secure uninterrupted digital classroom environment.

The Framework starts with an end-to-end Integrated Security Solution based on Fortinet's FortiGate Next Generation Firewall (NGFW) for a greater level of advanced threat protection. From that foundation, you can easily add infrastructure elements such as wireless, switching, and endpoint integrity. All of these elements work seamlessly together to provide purpose built security features such as antivirus, web content filtering (on and off the network), and end-to-end control of applications and network resources.

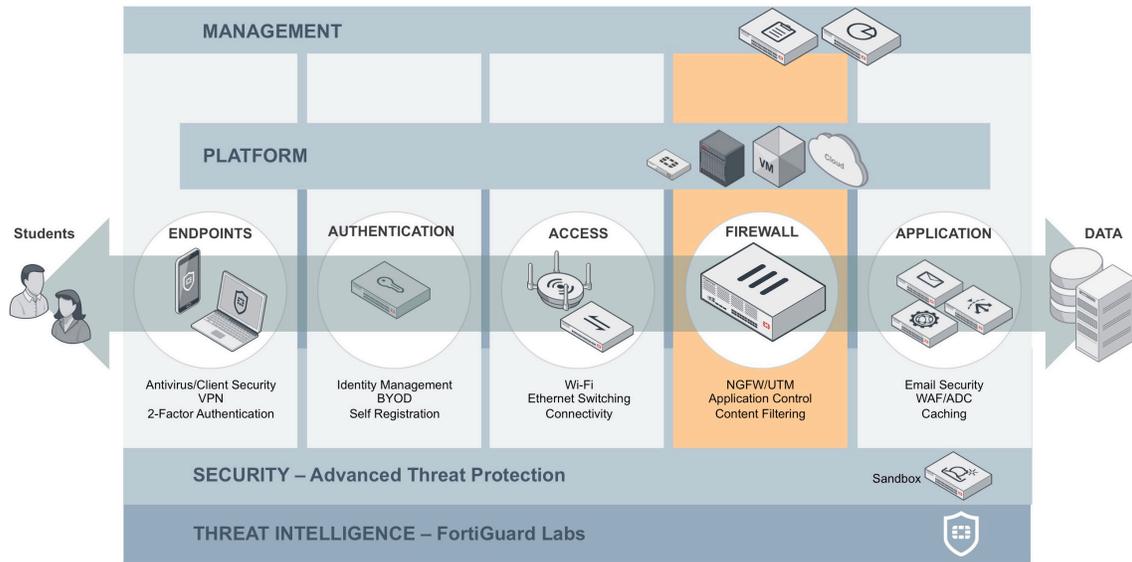

SOLUTIONS:

- Bandwidth Management
- Application Control
- Endpoint Protection
- Web Content Filtering
- IPS and AntiVirus

SECURE STUDENT FRAMEWORK

- End-to-end network and data security
- Integrated ecosystem of products that are optimized to work together
- Single pane-of-glass management
- Proven highest level of security available
- Cost effective solution that drives dollars back into the classroom
- Peace of mind that your network and data is secure

Fortinet Secure Student Framework

Fortinet is working with school systems throughout the globe to drive dollars back into the classroom with our consolidated security approach. Visit our website at www.fortinet.com/education or contact us at education@fortinet.com for more information on Fortinet’s solutions for education. We’ll demonstrate to you the many ways Fortinet reduces costs while improving network control, uptime, and security.

FortiCache
Web Caching Appliances

FortiSwitch
Ethernet Access and Data Center Switches

FortiAP
Wireless Access Points

FortiGate
High Performance Firewalls, UTM and NGFW
