Welcome to the Transfer Alerting Service

The NISO Transfer Code of Practice sets out best practices for scholarly publishers to ensure that journal transfers between parties occur with minimum disruption and that the content remains accessible. The Transfer Alerting Service (TAS) has been designed to facilitate communication of journal transfers and is hosted by the International ISSN Centre.

The TAS is made up of:

- A database of journal transfers which can be searched or browsed. This allows librarians and other interested parties to access the details of journal transfers announced through the TAS and provides an archive of transfer information supplied by publishers using the service.
- A notification service available through an RSS feed or by signing-up to an email list. Librarians, information professionals, and representatives of other organisations with an interest in journal transfers are encouraged to sign up to the list. Every time a journal transfer is announced through the TAS, registrants receive email alerts detailing the journal(s) involved, bibliographic information, and contact details for the publishers involved.
- An API which may be used by interested parties to query or integrate with the TAS.

Publishers are required to register with the International ISSN Centre to provide journal transfer information for announcement through the TAS. Under the terms of the Code, endorsing publishers are required to use the service whenever they receive a new journal.

For complete information about the Transfer Code of Practice please visit the NISO website (https://www.niso.org/standards-committees/transfer).

**Usage Statistics**

July 2017 - June 2018

- **Ecological Research**: 9
- **Population Ecology**: 7
- **PM&R**: 148
- **Ethics & Human Research (IRB)**: 11
Challenges - 1

- Loss of coverage
- Perpetual access rights
- Archive status
- License records documentation
- Contractual constraints
- Aggregators
- Transition lag time
Challenges - 2

Decision-making is complex:

• Committee acclimating to process
• Usage & cost per use
• Accreditation considerations
• Must consider new faculty hired
• Must consider course cycle
Challenges - 3

- Communication
- Receiving publisher doesn’t always notify
- Must continually revisit spreadsheet
- Must schedule testing
Solutions & Next Steps

- Conduct follow up testing on regular basis
- Document decisions
- Review and update license records
- Follow up on archive and perpetual access issues
Lessons Learned

• Process has evolved
• Big picture considered
• Accreditation considered
• Title transfers now handled proactively
• Spend time up front instead of after the fact
• Regularly scheduled decision making process
• Need to be proactively aware of backfile issues
• Ongoing Communication needed among stakeholders
Thanks for coming!
